AN INDEPENDENT DAILY NEWSPAPER

59th Year of Publication, No. 79 Montana State University, Missoula Thursday, March 31, 1960

YO-HO-HEAVE-HO—Pres. H. K. Newburn wields a shovel during ground breaking ceremonies during spring vacation for the Health-Sciences Building. The building is scheduled for completion in the fall of 1961 and will be five stories high.

Students Prepare Exhibits For Science Fair Judging

Science-minded students from all parts of Montana have prepared their exhibits and will begin to set them up in the Field House Friday morning for the Montana Science Fair. The fifth annual fair will be held Friday and Saturday, April 1 and 2. Dr. R. A. Diettert, chairman of the MSU botany department will be in charge.

Three hundred nineteen students, 189 boys and 130 girls, representing 54 schools are expected to take part in the fair. There will be two major divisions of exhibits: the Senior High School division, open to students in grades 10, 11 and 12 and the Junior High School division is open to grades 7, 8 and 9.

The Senior division exhibits will be in ten categories: astronomy and light; atomic energy, electricity and magnetism; botany; chemistry; conservation; geology; mathematics; medicine and physiology; mechanics, heat and sound; and zoology.

The two grand prize winners of the Senior division, a boy and a girl, will receive an all-expense-paid trip to the National Science Fair. Superior awards will be given to the next three best exhibits in the Senior division. The Montana Heart Association will give \$50 for the best exhibit in medicine and physiology, \$30 for second and \$20 for third.

Other awards include a seven-day U.S. Navy cruise for a sophomore or junior boy; Montana State University Scholarships for senior exhibitors with high scholastic records; first, second, third, fourth and fifth place ribbons will be awarded in each of the ten categories; honorable mention ribbon awards; a certificate of participation; and books, scientific equipment and cash.

The Junior division will be di-

vided into four categories: physical sciences, grades 7 and 8; physical sciences grade 9; biological sciences grades 7 and 8; and biological sciences grade 9. First, second, third, fourth and fifth place and honorable mention ribbons will be given in each category. Junior division exhibits are not eligible for national competition. A ten-volume set of "Book of Popular Science" will be awarded for the best exhibit in the Junior division.

Exhibits will be judged on creative ability, scientific thought, thoroughness, skill, clarity and dramatic value. Judging will take place from 1 to 5 Friday afternoon. Awards will be presented Saturday at 2:30 p.m. in the University Theater.

James Elected Head of IFC

Doug James, junior from Oakland, Calif., has been elected president of Interfraternity Council. James is a member of Sigma Phi Epsilon fraternity.

Other officers are Mike Curran, vice president; Chip O'Neil, secretary; and Tony Wastcoat, treasurer. Curran is a sophomore and a member of Sigma Nu. O'Neil is a sophomore and a member of Sigma Chi. Wastcoat is a junior and a member of Phi Sigma Kappa.

The new officers were elected the last week of winter quarter.

World News Roundup

Flooded Rivers Are Ice-Choked

By United Press International

Ice-choked rivers which drove thousands from their homes threatened new floods today from the plains states to the East Coast.

Water-logged Nebraska, the worst-afflicted state, fought the raging rivers with sandbags and dynamite. Helicopters plucked stranded families from roof tops and dropped food and medicine to towns isolated by miles of water.

Demolition experts set off charge after charge of dynamite in an effort to smash mountainous ice jams.

The death toll climbed to 10-four in Missouri, three in Nebraska and one each in Illinois, Kansas and Michigan.

CAMPAIGN CONTINUES

Police turned fire hoses on 150 Negro demonstrators at Marshall, Tex., Wednesday; about 5,000 Negro students marched on the Louisiana state capital of Baton Rouge to sing and pray; 200 whites and Negroes held a prayer meeting of "dissatisfaction" outside the mayor's office at Nashville, Tenn.

The second full month of a concerted Negro campaign to integrate lunch counter facilities in the South ended yesterday with a near riot in Texas and a cautious compromise proposal in North Carolina.

AFRICANS SUPPRESS NEWS

JOHANNESBURG, South Africa The South African government announced yesterday it had assumed powers to make arbitrary arrests, suppress newspapers and break up public meetings with firearms to contend with a wave of racial violence.

Central Board Approves New Athletic Policy

Central Board approved the athletic committee's redefinition of athletic policy for MSU last night. President Ed Risse read the new policy to the representatives and explained the various components.

Walter Brown, Central Board faculty adviser, introduced the subject again later, and urged Central Board to draw up a resolution declaring their stand on the issue. Several delegates stated they would like to discuss the new policy with the groups they represent. Risse and Paul Ulrich, junior delegate, urged the representatives to vote according to their own minds and consciences.

Ulrich's motion that a resolution in support of the new policy be drawn up was passed. A committee was appointed to act on the motion.

Dr. Schuster to Resume Lectures Thursday Night

The Thursday-evening lectures on great philosophers will be resumed this week by Dr. Cynthia Schuster. The first lecture will be about Hegel.

The lectures are held each Thursday evening during the quarter in LA Room 104 from 7:10 to 8 with a half hour of discussion among those who choose to remain. Upper division students may take the course for one hour credit. The lectures and discussion are open to the public without charge.

By GAYLORD GUENIN and JOHN BENNITT

In an attempt to halt the increasing athletic costs, the University has introduced a new athletic policy which will eliminate all fringe benefits in future athletic scholarships.

Beginning with the 1961 fall term, MSU will launch a program to reduce full-ride athletic scholarships over a four-year period.

The new program will offer \$283 individual scholarships annually, as compared with the present annual payment of approximately \$1,000.

The new scholarships will defray only in-state fees, which

See Sports Page for full text

total \$283 annually under the present tuition rate. Fringe benefits, such as board and room, books, tutoring, incidental costs and out-of-state fees, will be eliminated by the end of the four-year period.

University athletes who are currently receiving aid under the old scholarship program will continue to receive scholarships on that basis for the rest of their athletic participation at MSU.

The new policy was formed by President H. K. Newburn and the Faculty Athletic Committee after a series of meetings which included participation by members of the University Century Club.

In an interview, Dr. Newburn said that the University does not plan to break its affiliation with the Skyline conference. He said MSU will study the possibilities of joining a new conference if necessary.

Dr. Newburn emphasized the University's intention to maintain a full program of intercollegiate sports. He voiced the hope that other Skyline Universities will follow MSU's athletic plan.

Dr. Newburn said that the University is forming the new policy on the assumption that student athletic fees will not be cut. He said he feels that students are contributing all that can be asked of them.

The University now has approximately 90 athletes on scholarships, but under the new program it is hoped that this number may increase to 150 in the distant future, Dr. Newburn said. There will also be an attempt to provide more scholarships for the minor sports (tennis, golf, baseball, track and swimming). He said the long-range plan also contained provisions for the introduction of additional varsity sports in the athletic program.

Jack Ryan, director of publications and news service, said the cut in athletic scholarships will mean a loss of many out-of-state athletes because scholarships will not cover tuition.

In an interview, George Dahlberg, director of athletics, said that under the circumstances the athletic department believed the new policy is necessary to form a practical intercollegiate program.

"Montana State University, along with a number of other colleges and universities, has been forced to subsidize athletes with continually increasing costs. After careful consideration, we (the athletic department) believe that it is best for our University to take a sensible approach to intercollegiate athletics," he said.

Dahlberg said that intercollegiate athletics had reached the point where the tail was wagging the dog.

Mongar Presents Petitions For Referendum to Board

Signed petitions requesting a referendum on three proposals were presented to Central Board last night by Thomas Mongar, senior in political science.

Editor's Note: See Petition On Page 2

Mongar told the Board that he had 532 signatures of under-graduates on the petition. Only 435 signatures are needed to place the proposals on the ballot, President Ed Risse said.

In explaining the proposals, Mongar said that the request for a decrease in the activity fee for athletics would serve as a re-enforcement of the athletic committee's new policy.

"We feel that President Newburn, although he means well, may not stay here very long because of this action," Mongar said.

He explained his revision of his former constitution proposal to the

board as an effort to comply with some student requests for changes and to present a more coherent form to the students.

Mongar said that Central Board's request for an increase in the activity fee last year was unfounded.

"Last year's Central Board merely put its finger in the air and guessed that it needed an increase in the activity fee," he said.

Paul Ulrich, junior delegate, moved that the three proposals be put on the ballot. He said there was little doubt that the petition was invalid and a vote by the Board would save the election committee the trouble of validating the signatures.

Ulrich's motion was defeated. Dave Morris, freshman delegate, suggested that Central Board declare itself either for or against the referendum proposal at a later date.

Athletics May See a New Era

The University decision to cut athletic scholarships came without warning like a bolt of lightning, although the storm has been brewing for a long time.

Now all we can do is survey the results.

Surely some people, namely out-of-state athletes, will be hurt. Perhaps alumni will feel the University has thrown away its only hope for successful teams.

But we do not think so.

First, look at the record. The University has been in the cellar year after year with teams which seemed jinxed. Increases in scholarships only brought the athletic department to its knees before Central Board last April, asking for \$25,000 to get out of trouble.

A Kaimin editorial at that time simply stated, "This action has saved the University further embarrassment and poor publicity."

There are two other Skyline Conference Universities which are considering cutting athletic scholarships, according to Jack Ryan, director of publications and news service. It will be interesting to see if they follow along, because they too are having financial difficulties.

But, perhaps more important than finances, is that a trend may begin. College sports may be given back to college students. The era of competing professionally may be coming to an end.

This should be good news to athletes who, deep down and without reservation, love athletics. It means more time can be spent training teams than scouting for them. It means that local yokels, like you and me, can try out for the football squad and make it. It means, we hope, that college spirit will creep back into games.

Anyone who saw the Bobcat-Grizzly basketball game will surely agree there was a healthy, feverish, wholesome spirit which brought the crowd to its feet every time the ball hit the hoop. Spectators spilled out onto the floor after the game cheering and yelling like happy children. A few of the wilder ones picked a fight.

This is the spirit which makes college athletics unique. It does not come from hiring players. It comes from the heart of a spirited University.

It was a courageous decision to be the first Skyline University to cut athletic scholarships. Finances make it a wise move.

But let's hope a different kind of game will come from it . . . a game which students twenty years ago played and loved.

Editorial Camera—

A WORD OF THANKS—The campus is littered with a new kind of obstruction which has given everybody a chuckle. The Buildings and Grounds Department thought up the signs and had them painted. Then the Bearpaws went to work and scattered them around on all the cow paths across campus. Well done.

Mongar Explains Circulating Petition

To the Kaimin:

I would like to explain the purposes of the petitions which began circulating on March 27. Anyone who has either signed or read one will note that it requests that three (3) referendums (A, B & C) be placed on the Primary and General election ballots.

Referendum A requests that the proposition "The non-athletic Student Activity Fee shall be reduced \$2.00" be placed on the Primary election ballot in order to give the students a chance to decide the issue. If you will remember, the vote last Spring ended in an 836 tie. Central Board decided in favor of the increase. Subsequent months have proved that the increase was never needed. It was the result of an error in judgment on the part of last year's Central Board. Since they had no executive budget, they had no way of knowing. They guessed and they were wrong.

Referendum B requests that the proposition "Payment of \$5.00 of the current \$10.00 per student per quarter Athletic Fee shall be made optional to each student" be placed on the General Election ballot. This would simply reverse last Spring's decisions if it were accepted. Certainly enough interest has been shown in athletic demeritism to warrant such a request.

Referendum C requests that the proposition "The Revised Draft Constitution for ASMSU shall be adopted" be placed on the Primary election ballot. The supporters of this request are by no means supporters of referendums A and B. We simply sought to save space and work in presenting it with the other two. Our reason for taking this route instead of the one charted by Central Board is because theirs will lead to inaction. First, the constitution was sent to Planning Board where nothing was done with it. Then, it was placed in the hands of an ad hoc committee which hasn't even met yet. Now, we know that Risse and Adams genuinely want to get this on the ballot, but there are other members on Central Board who plan to delay it ad infinitum, or until it is

too late to put it on any ballot this year.

It is not important that you agree or disagree with the propositions on the petition. It simply asks that you, by your signature, give the entire student body a chance to vote on these issues. We are doing it soon enough, contrary to recent precedent, to allow a full debate of each issue so that the student body will have enough information to allow them to make up an informed decision in the elections. We who initiated the petition seek only to exercise a democratic right — grass roots legislation. Sign the petition. Don't tear them up as was done last year. Give the students a chance to vote.

Thomas M. Mongar

Petition

Referendum A

(For the Primary Election)

The Associated Students of Montana State University recommend to the Montana State Board of Education that the non-athletic Student Activity Fee be reduced from \$7.00 per student to \$5.00 per student per quarter. The proposition is to be presented in this way:

The non-athletic Student Activity Fee shall be reduced \$2.00. (yes or no).

Referendum B

(For the General Election)

The Associated Students of Montana State University recommend to the Montana State Board of Education that payment of \$5.00 of the current \$10.00 per student per quarter Athletic Fee be made optional for each student. The proposition is to be presented in this way:

Payment of \$5.00 of the current \$10.00 per student per quarter Athletic Fee shall be made optional to each student. (yes or no).

Referendum C

(For the Primary Election)

The Associated Students of Montana State University wish to adopt the Revised Draft-Constitution for ASMSU providing for a Presidential system of Government. The proposition is to be presented in this way:

The Revised Draft Constitution for ASMSU shall be adopted.

APPLIED PHILOSOPHY 221

Thought Process of Women

Dr. A. Tract

Emphasis on philosophy of getting dates. Background of dateless students who use sticky hair creams or alcohol hair tonics. Fundamental logic of students who have discovered that 'Vaseline' Hair Tonic takes care of hair even when used with water. Philosophy of the Enlightenment: one may use all the water one wants with 'Vaseline' Hair Tonic. Students who use 'Vaseline' Hair Tonic *think*—therefore they are sought after by lovely females. Cause: 'Vaseline' Hair Tonic. Effect: Dates.

Materials: one 4 oz. bottle 'Vaseline' Hair Tonic

Vaseline
HAIR TONIC

In the bottle and on your hair
the difference is clearly there!

'VASELINE' IS A REGISTERED TRADEMARK OF CHESEBROUGH-POND'S, INC.

U Athletic Scholarship Policy

During the past two decades universities and colleges have been caught in an upward spiral toward larger and larger subsidies for athletes. Today there are many institutions, including Montana State University, that underwrite practically the entire cost of an athlete's college education, including tuition and fees, board and room, books, tutoring and incidental costs. It is the fundamental mission of Montana State University to be an institution of higher education, and we believe that a program of full scholarships for athletes is inconsistent with that mission.

Beginning with the fall of 1961 MSU will no longer attempt to provide such major subsidies. In making this announcement, the University wants to re-assert and re-emphasize its basic interests in maintaining a full program of intercollegiate sports and its desire to be competitive in such an enterprise. In the event that others among our conference affiliates do adopt such a policy in the immediate future Montana State University will be able to compete on a more favorable athletic basis than has been possible heretofore.

Several urgent reasons have contributed to our decision. The primary factor is our belief that it is high time to reincorporate intercollegiate athletics into the fabric of the institution, and thus make it an integral part of the education environment provided to the student. We do not believe that a program based on obtaining athletes at the auction block level is a necessary part of the process of giving and receiving a University education.

Beginning with the fall of 1961 qualified freshman athletes, because of the fact that they cannot work during their season of competition, will be subsidized by MSU to the extent of their in-state fees, amounting to \$283 annually, based on present rates. In 1962 this type of subsidy will be extended through the sophomore level, in 1963 through the junior level and in 1964 through the senior level, thus completing full transfer to the new program. It is our hope that eventually we may have many more students on such a program, spread over a wide number of sports. The University itself expects to extend 50 grants-in-aid amounting to \$120 each per year toward the total of \$283 in fees. These grants will be given as fee waivers to freshman athletes in the upper one-half of their high school graduating classes or to upper classmen who are above the all-University men's grade average. All other scholarship funds to be granted under the new program are expected to come from athletic income and athletic fees.

It is a simple fact that athletic income from all sources is not adequate to maintain a program of full athletic scholarships now or in the foreseeable future. Even under the best of circumstances it is unlikely that MSU will ever be able to support a satisfactory program of full subsidy for athletes. Thus, the choice financially is to continue with an inadequate program of full subsidy, or to install a well-balanced program such as that outlined herewith. Furthermore, the proposed program is consistent with the educational purposes of the University.

We solicit the support of all Montanans and particularly of the MSU alumni and the Century Club for this new course. Support from the University will be limited as defined, but we will welcome the contribution of funds to the Endowment Foundation to be used in payment of out-of-state fees for non-resident athletes and to cover other incidental costs. While we realize that we may have to do without the services of a number of young men who are primarily interested in athletic competition for the greatest amount of personal gain, we feel that there are other compensations to be obtained from this new policy. There are many young men of fine athletic ability who select an institution such as ours for the primary purpose of obtaining an education. It is our belief that this type of student will prefer to attend a school where the athletic program is well-balanced and where the athlete is accepted on the same basis as other students.

We further believe that there are many parents who are able and willing to send their sons to such a University and pay the full cost of receiving an education. In cases where the parents find it impossible to provide the full cost for educating their athletically-talented sons, we believe that these parents will help their sons to find other ways to complete their studies, just as the parents of non-athletes must do at present.

In making this decision, Montana State University is endeavoring to guide itself sensibly in the direction of making the best long-range contribution to the state. We solicit the understanding and support of all friends of the University as we move through the trying years ahead in an attempt to reorganize on this new program, which we believe to be both educationally and fiscally sound.

H. K. NEWBURN, President

EARL LORY, Chairman, Faculty Athletic Committee

Softball Managers Meet Today at 4 in Men's Gym

Intramural managers will meet this afternoon at 4 in the Men's Gym to plan the intramural softball season and the program for other spring sports.

Intramural director Ed Chinske said that rosters for men's softball teams are due in his office in the Men's Gym tomorrow afternoon. Mr. Chinske said that the softball league needs the services of several umpires, and that interested persons may leave their names and addresses at his office.

Intramural golf will begin in about two weeks and there will be a tournament late in May. A horseshoe tournament will be held the third week in April.

Mr. Chinske also put out a call for students who are interested in trying out for the University golf team.

'Tip Diamond Men Lose Four, Tie One in 'Spring Training'

Montana's baseballers fared poorly on their annual outing to Lewiston, Ida. during spring vacation.

The Grizzlies' spring training session saw four losses, two to Yakima Junior College and to Washington State and Idaho. The Sivertips wound up the tour by tying power-laden Oregon State. The Oregon State squad previously had whipped Washington State and Idaho.

The Grizzlies have a week of practice before their next game, a doubleheader against Montana State College April 8 at Campbell Park.

Coach Hal Sherbeck said things went about as he expected. He said the defense held up well but pitching and hitting left a lot to be desired. He said the Grizzly nine wasn't impressive except in the Oregon State game.

Sherbeck said that pitchers Ed Komac and Butch Hendricks showed well in their stints on the mound. Sherbeck said that transfer catcher Chuck Miltenberger and veteran backstop Floyd Ayers hit well on the trip. Sherbeck cited infielders John Matte, Bob O'Billovich, Tom Peterson and Dick Held and outfielders Jim Johnson and Al Craig for capable work.

The 1 out of 20 that didn't get smoked

There's a lot of satisfaction in pointing out something good to a friend. That's why it often happens that one cigarette out of a pack of Dual Filter Tareytons never does get smoked.

People break it open to demonstrate its unique Dual Filter containing Activated Charcoal. They may not know why it works so well, but they do know this: It delivers far more than high filtration . . . it brings out the best taste of the best tobaccos—as no single filter can!

Try a pack of Tareytons. We believe the extra pleasure they bring will soon have you passing the good word to your friends.

HERE'S HOW THE DUAL FILTER DOES IT:

1. It combines a unique inner filter of ACTIVATED CHARCOAL . . . definitely proved to make the smoke of a cigarette mild and smooth . . .
2. with an efficient pure white outer filter. Together they bring you the real thing in mildness and fine tobacco taste!

NEW DUAL FILTER **Tareyton**

Visiting Lecturer Will Present Series on Origin of Elements

William A. Fowler, visiting lecturer, will present the second of a series of three lectures on "The Origin and Age of the Elements," today at 4 p.m. in Math-Physics 109. The third lecture of the series will be held Friday at 9 a.m. in Math-Physics 109. The lectures are open to all students and faculty.

Dr. Fowler will also give a public lecture on "Physics and Astronomy in Russia and Uzbekistan" tonight at 8 p.m. in Math-Physics 109.

Dr. Fowler, professor of physics at the W. K. Kellogg Radiation Laboratory of the California Institute of Technology, will be here as a visiting lecturer until tomorrow. His visit is sponsored by the American Association of Physics Teachers and the American Institute of Physics as part of a nationwide program to stimulate interest in physics. The program, now in its third year, is sponsored by the National Science Foundation.

Dr. Fowler received a B.S. degree in engineering physics from Ohio State University and a Ph.D. from California Institute of Technology, where he has been on the faculty since 1936. His research is concerned with studies of nuclear forces, structure of light nuclei, thermonuclear sources of stellar energy, and element synthesis in stars.

During World War II he worked on development of proximity fuses, rocket ordinance, and atomic weapons. He supervised research and development at the Naval Ordnance Test Station at Inyokern, Calif., in 1945, and served as scientific director of Project Vista for the Department of Defense from 1951 to 1952.

Dr. Fowler was awarded the Medal for Merit in 1948, the Ohio State University Lamme Medal in 1952, and served as Fulbright lecturer and Guggenheim Fellow at Cavendish Laboratory at the University of Cambridge, England, in 1954-55. He was elected to the National Academy of Sciences in 1956.

BALL PLAYERS WILL MEET

Freshmen men and transfer students interested in the freshman baseball team will meet tonight at 7:30 p.m. in the Century Club of the Field House, according to Hal Sherbeck, baseball coach.

CALLING YOU . . .
Sentinel Staff, 4 p.m., Friday, Sentinel office.

Publications Board, Friday, 4:00 p.m., Committee Rooms, Lodge. Pictures will be taken.

Merry Charioteer Completes Career Of Shifting Gears

By ARLENE MYLLYMAKI

Jake Rangitsch climbed down from the cab of an MSU truck today for the last time after 27 years of service. Upon retirement he was named "Truck Driver Emeritus" by the University.

Jake's laugh-wrinkled face and perpetual cigar are known to thousands of MSU students. The document attesting to Jake's activity

"Truck Driver Emeritus"

as a gear jammer cites his many years of service to the University. The parchment was signed by Pres. H. K. Newburn and by Frederick Krieger, superintendent of buildings and grounds.

Rangitsch first worked at the University in 1933 as a hod carrier on the construction of the Student Union (now Fine Arts) building. When the building was finished, he stayed on as custodian for four years before transferring to the outside physical plant crew. Since 1939 he has been rolling up an average of 80 miles a week as a campus truck driver.

Rangitsch was one of 45 survivors of the "lost battalion" in the World War I Battle of the Argonne Forest. He emerged alive from a five-day siege under German fire by masquerading as one of the dead.

Rangitsch has three sons and four daughters. His son, Robert, attended MSU.

Rush Registration Terminates Today

Registration for sorority spring rush ends today at 4 p.m. The \$3 fee is payable in the office of Miss Maurine Clow, associate dean of students, according to Diane Mossey, Panhellenic president.

To be eligible for rush, women must have 14 credits and a C average last quarter, Miss Mossey said.

Those registered will meet in the Lodge at 4 p.m., Tuesday, April 5, for a general briefing. Open houses will start at 4:30 p.m. and end at 9:15 p.m. There will be two half-hour parties before dinner and four afterwards, Miss Mossey said.

Sororities will then issue invitations for either lunch or dinner on Wednesday through Friday, April 6-8.

English Professor Will Be Honored

MSU will honor Edmund L. Freeman, Professor of English, during an academic festival beginning tomorrow and continuing through April 8. This honor is in recognition of over 40 years of service to the University.

The festival will include private fetes given by various faculty groups and other friends. The climax of the week will be a public address April 8 by I. A. Richards, noted author, literary critic and Harvard professor. A reception will be held at the Faculty House following the address, according to Vedder M. Gilbert, chairman of the English department.

Mr. Richards and his wife will arrive Friday and accompany the Freemans on a tour of Glacier Park Monday and Tuesday.
